EDUCATION

TECHNOLOGICAL INSTITUTE OF THE PHILIPPINES

Bachelor of Science in Information Technology, Specialization in Data Analytics

Manila, Philippines

Graduated: June 2026

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, PHP, C#, SQL, HTML5, CSS3, React, Next.js, Node.js, NestJS, Laravel

Databases & ORM: PostgreSQL, Supabase, Prisma ORM, MySQL, SQLite, Firebase, Firebase Firestore

Testing & Tools: Jest, Vitest, React Testing Library, Supertest, Git, GitHub, VS Code, Figma, Unity, Gradio, pnpm, npm Workspaces

IT & Infrastructure: Linux (CLI), Windows, macOS, IT Diagnostics, System Debugging, Router/Switch Config, Basic Networking

PROFESSIONAL EXPERIENCE

RAKSO COMPUTER TECHNOLOGY INC.

Backend Developer Intern

Makati City, Philippines

Jan 2026 – Apr 2026

- Participated in application testing and debugging during system development to identify, isolate, and resolve technical bugs and software issues.
- Created system flowcharts, technical specifications, and process models to document workflows and communicate technical architecture to supervisors.
- Collaborated in the planning, backend development, and database integration of an Event Management module for an existing web portal using Laravel and SQLite.
- Worked closely with cross-functional teams in an Agile Scrum framework to execute software updates, conduct module testing, and support issue resolution.

TECHNICAL PROJECTS

INTERNAL OPERATIONS MANAGEMENT PLATFORM

Fullstack Developer

- Developed a full-stack internal platform for managing leads, clients, team access, and client assignments with role-based access control (RBAC).
- Implemented authentication and session management using Google OAuth and JWT, with protected routes and role-based authorization across CRM workflows.
- Implemented lead-to-client conversion workflows and background automation for AI-assisted reporting and integrations with external services.
- **Tools & Technologies:** TypeScript, Next.js, React, NestJS, PostgreSQL, Supabase, Prisma ORM, Tailwind CSS, Google OAuth, JWT, pnpm, Git/GitHub

PERSONAL ACCOMPLISHMENT & REFLECTION PLATFORM

Fullstack Developer

- Developed a full-stack platform for recording daily accomplishments, featuring timeline views, search, analytics, and comprehensive filtering and sorting capabilities.
- Implemented secure user authentication and onboarding with Argon2id, email verification via Resend, Google Sign-In, and request validation using class-validator.
- Integrated Google Gemini API for AI-assisted reflections and analytics, developing REST APIs supporting pagination and timezone-aware business logic.
- Added unit, integration, and API tests using Jest, Vitest, React Testing Library, and Supertest within an npm Workspaces monorepo.
- **Tools & Technologies:** TypeScript, React, Vite, NestJS, Node.js, PostgreSQL, Prisma ORM, class-validator, Google Gemini API, Argon2id, Resend, Jest, Vitest, Supertest, ESLint, Prettier, npm Workspaces, Git/GitHub

ARSEMBLE: AN AUGMENTED REALITY APPROACH TO PC BUILDING WITH NLP

Backend Developer

- Built backend infrastructure using Firebase to manage user authentication and application data for an educational platform designed for PC hardware assembly guidance.
- Investigated, debugged, and resolved AR camera interface issues to improve overall stability and performance across mobile devices.
- Implemented the Learning Hub feature by integrating third-party services via YouTube API for video-based tutorials.
- **Tools & Technologies:** Unity, C#, React, Firebase, YouTube API, Figma

PERSIAN ALPHABET CHARACTER RECOGNITION

Machine Learning & Software Developer

- Designed and developed an Optical Character Recognition (OCR) system that recognized Persian alphabet characters and converted them to Latin equivalents.
- Built and trained a CNN using PyTorch with OpenCV preprocessing, and developed an interactive Gradio interface backed by SQLite.
- **Tools & Technologies:** Python, PyTorch, OpenCV, Gradio, SQLite
